

OUR ACCREDITATION – YOUR BENEFITS

Our accreditation implies:

- Trusty sampling of water and filter media
- Reliable water and filter media analyses according to latest regulations
- Water works audits including sound advice for optimisation of treatment processes

OUR CUSTOMERS

Customers who rely on our services:

- Water supply companies
- Plant manufacturers
- Industrial water plants
- Engineering offices
- Authorities

AWA INSTITUT

WATER AND FILTER MEDIA ANALYSES

AWA INSTITUT WATER AND FILTER MEDIA ANALYSES

DRINKING AND RAW WATER ANALYSES

Analyses for:

- Drinking water
- Ground and surface water
- Swimmingpool
- **Qualified sampling and testing** of chemical and chemo-physical parameters with state-of-the-art analytical equipment according to your special needs
- **Comprehensive evaluation of the results** with your specific circumstances considered
- **Digital transfer of test results**, available in many different formats

FILTER MEDIA ANALYSES

- **Analyses of your filter media for water treatment** to check the conformity with your own internal quality system and/or your national regulations
- **Improvement of the operational safety** in your treatment plant: **inspection of the filtrate's quality** and of the **functionality of the material**
- **Depth-integrated sampling** of filter media from your filter tank

EXPERT SUPPORT & TAILOR MADE SOLUTIONS

- Development of a test program according to your individual needs
- Installation and running of on-site pilot filters in your water works
- Performance of lab scale tests to compare different filter media
- Function checks of your water treatment plant
- Evaluation of the results by our experienced application engineers
- Improvement proposals to optimise your filter unit
- Process conception advice in close co-operation with your team

The AWA-Institut is accredited according to EN ISO/IEC 17025 and is therefore officially approved as an independent testing institute.

Since 1972, the AWA-Institut has expertise in water and filter material analyses, applied water chemistry and water treatment process conception.

Our application technology department is familiar with a wide variety of application options. In close co-operation with your team, we work out the optimum solution for your individual requirements.
